

MEDRECS

...Tips to remember when submitting requests...

Type of injury: On the Job

Records to Retrieve

- L&I
- Social Security (Wage Loss)

Tips to Remember

- IME doctors' records are often contained in L&I records.
- Request detailed earnings reports from the local SSD office, not the national office in Baltimore. We've noticed this significantly cuts down on turnaround time!

Type of injury: Auto accident

Records to Retrieve

- Emergency transport records and billing, ER doctors records/billings
- Anesthesiologist/Surgery Center
- PIP File

Tips to Remember

- Key info: *Date of Loss* and *location* of medic team response.
- Records maintained at hospital or where surgery was performed.
- Often times anesthesiology bills will come from outsourced billing service.
- If billing service is not known up front, it will be determined once records are located/received.
- Will show what was submitted for payment and what was actually paid.
